CARDSONLINE

The complete ID solution you can trust

THE RITE OF PASSAGE ORGANISATION PROVIDES LOCATIONS ACROSS THE NATION WITH ID CARDS USING CARDSONLINE

The Rite of Passage organization started working with CardsOnline at the beginning of this year. Together with our partner Laminex we deployed the ID card solution in the cloud. The Rite of Passage now provides ID card production and management to all their locations from one central online system.

Integrated with the HR System, CardsOnline 6.3 creates a full integrated system for enrollment, printing and issuing of multi-purpose employee ID cards. Laminex provided all locations with an ID Card Printer and supplies to print the cards.

THE SOLUTION

CardsOnline is installed on a dedicated, secure Microsoft Assure server with a webservice interface connecting to the Rite of Passage HR-system to import employee data. Rite of Passage uses a contactless proxcard for access control and prints cards on a single sided card printer. The card design created in CardsOnline contains a barcode for scanning purposes.

RITE OF PASSAGE
### IMPROVING THE LIVES OF YOUTH

CLIENT PROFILE

- Rite of Passage helps over 2,000 at-risk and vulnerable youth a year across the nation

- Operates 40 programs in 16 states across the United States and is based in Nevada

Aux:	**Webcam and IPcam for Photo capturing**
Card Type:	**Proxcard**
Number of Cards:	**Approx. 3500 Cards issued**
Partner:	**Laminex**

Laminex®

CARDSONLINE

CardsOnline offers an easy and cost effective solution. CardsOnline is the binding element between the systems related to the employee ID card i.e. systems for HR, Access Control, Payment and Print & Copy, making production and managing of the card simple and effective.

Advanced password protection ensures protection of both users and data in the entire system. Management of users is quick and easy by creating and assigning specific roles to certain access levels or features.

With CardsOnline, organizations create a central application with all card related information and more: photos, fingerprints, personnel data, as well as certificates, signed documents and copies of ID cards.

- ☐ **Cloud Solution**
- ☐ **Centralized data management**
- ☐ **Connects to existing databases**
- ☐ **Advanced user management system**
- ☐ **Design your own cards**
- ☐ **Import and export data**
